Sediment Pleated - Standard Diameter

(Harmsco Brand)

The Harmsco Pleated cartridge is made from an exclusive blend of Polyester-Plus™ filter media, specially made for sub-micron filtration. This unique fiber will not shrink, delaminate or migrate. End caps are Platisol (PVC). Center cores are ABS. All materials are FDA accepted, and may be used for potable water and liquid food applications.

The Harmsco cartridge has up to 50% more surface area than conventional pleated cartridges. The media is pleated to maximize dirt-holding capacity and extend the time period between changes. Due to the sub-micron rating this cartridge is suitable for fine sediment removal and can also be used for Cyst reduction. This cartridge fits most standard 10" housings.

Features and Benefits

- Price Competitive
- Superior Filter Surface Area
- Maximized Dirt Holding Capacity
- Excellent Filtering Performance
- Low Pressure Loss
- Individually Wrapped and Sealed

General Specifications

- Micron Ratings (Nominal): 0.35
- Lengths: 248mm (9¾")
- Outside Diameter: 70mm (2¾")
- Inside Diameter: 27mm (1 ⅛")
- Filter Area Approximately: 0.56m² (6 ft²)
- Temperature Ranges: 4.4°C - 60°C (40°F - 140°F)

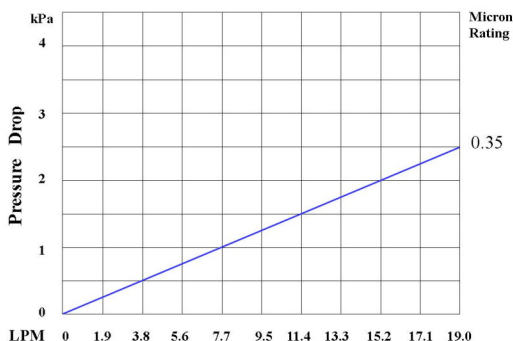

NOTE:

Recommended cartridge change is at a maximum increased pressure differential of:

69 kPa (10 psi)

Flow Performance

*Based on 10" length filter in clean water

Warning:

For drinking water applications, do not use water that is microbiologically unsafe or of unknown quality without adequate disinfection.

Typical Applications

- Domestic
- Rural
- Commercial
- Food & Beverages

Note: Watermart recommends not to clean the cartridge due to the sub-micron rating.
