Empty Cartridge Canister

The In-Line Canister is designed to meet the market requirements for a Refillable Cartridge for loading with various medias. The Polypropylene construction in combination with different medias make it suitable for a wide range of applications including: pH correction, Chlorine reduction, Hardness removal, Organic Colour and Taste correction, and Deionization.

The design of the cartridge ensures maximum contact time with the media for optimum performance and incorporates a Compression pad to discourage channelling. The Canister has a Pre-Filter pad for Sediment removal and a 10 micron Post-Filter to prevent media fines from passing. Each end of the canister is threaded for easy media replacement.

Features and Benefits

- Price Competitive
- Simple Installation
- 1/4" Push Fit Connections
- Compact Design
- Refillable
- Wide Variety of Applications

Typical Applications

(Depending on Media used)

- Post-Reverse Osmosis (RO)
- Taste and Odour Reduction
- Scale Prevention
- pH Correction
- D.I. (Deionization)

General Specifications

- Micron Rating (Nominal): 10
- Connection: 1/4" Tube (Quick Connect)
- Length: 250mm (9 7/8")
- Outside Diameter: 50mm (2")
- Canister Media Capacity: 0.4 Lts
- Temperature Ranges: 4.4°C - 43°C (40°F - 110°F)

Note:

Capacities and Flow Rates are dependent on the types of Media used.
The Cartridge Canister is supplied Empty.

Warning:

For drinking water applications, do not use water that is microbiologically unsafe or of unknown quality without adequate disinfection.

Series: WCEICQF14
