

Carbon Cartridge - Standard Diameter

(PENTEK Brand)

Proudly Australian

The CBC Series cartridges are highly effective at reducing unwanted taste, odour and chlorine: taste and odour, from potable drinking water. The unique structure of the carbon block enables it to reduce *Giardia*, *Cryptosporidium*, *Entamoeba* and *Toxoplasma* cysts and fine sediment particles down to 0.5 microns.

The CBC Series cartridges are manufactured using a patented process and made entirely from FDA-compliant materials. They are an ideal choice for a wide range of residential, food service, commercial, and industrial applications. They also make excellent polishing filters or pre-filters in applications requiring fine filtration and high capacity. The filter fits most standard 10" and 20" housings.

Features and Benefits

- 99.95% Cryptosporidium & Giardia reduction
- Radial Flow Design
- One Piece Molded Carbon Briquette
- Excellent Filtering Performance
- NSF/ANSI Standard 42 for Material Requirements Only
- Individually Wrapped and Sealed

Typical Applications

- Domestic
- Rural
- Potable water
- Commercial
- Cyst Reduction
- Food and Beverage Services

General Specifications

- Micron Ratings (Nominal): 0.5
- Lengths: 250mm (9⁷/₈"
508mm (20")
- Outside Diameter: 71mm (2⁷/₈"
- Inside Diameter: 28mm (1¹/₈"
- Temperature Ranges: 4.4°C - 52°C
(40°F - 125°F)
- Filter Capacity:
(per 250mm length) @ 3.8 lpm 75,700 Lts

(Estimated capacity based on 2.0 mg/l free available chlorine, capacity will vary depending on raw water quality.)

NOTE:

Recommended cartridge change is 6-9 months from date of installation, or earlier if required or at a maximum increased pressure differential of 69kPa (10psi), whichever occurs first.

Flow Performance

*Based on 10" length filter in clean water

Warning:

For drinking water applications, do not use water that is microbiologically unsafe or of unknown quality without adequate disinfection.
