# Carbon Cartridge - Standard Diameter

(KX Industries Brand)

The "All Carbon" CERAMIKX® filter combines the fine particulate reduction of a traditional ceramic filter with the chlorine, taste and odour reduction of an activated carbon filter. With 0.2 micron filtration the filter will reduce more than 99% of *E. coli*, *Giardia* and *Cryptosporidium* cysts.

The CERAMIKX® filter is manufactured using MATRIKX® extruded activated carbon particles fused into a uniform block with enhanced adsorptive capacity and efficiency. The radial flow provides increased dirt capacity and low pressure drop. Unlike GAC filters the CERAMIKX® will not channel or by-pass due to their extruded activated carbon core. The filter fits most standard 10" housings.

## Features and Benefits

- 99.9996% E. coli Reduction
- Cryptosporidium & Giardia Reduction
- Radial Flow Design
- One piece Extruded Carbon Block
- Excellent Filtering Performance
- NSF Standard 53 Cyst & Class Turbidity
- Individually Wrapped and Sealed

## Typical Applications

- Domestic
- Rural
- Potable Water
- Commercial
- Cyst Reduction
- Food and Beverage Services

## General Specifications

- Micron Ratings (Nominal): 0.2
- Lengths: 248mm (9¾")
- Outside Diameter: 64mm (2½")
- Inside Diameter: 28mm (1⅛")
- Temperature Ranges: 4.4°C - 52°C (40°F - 125°F)
- Filter Capacity: @ 2.8 lpm 7,570 Lts

(Estimated capacity based on 2.0 mg/l free available chlorine, capacity will vary Depending on raw water quality.)

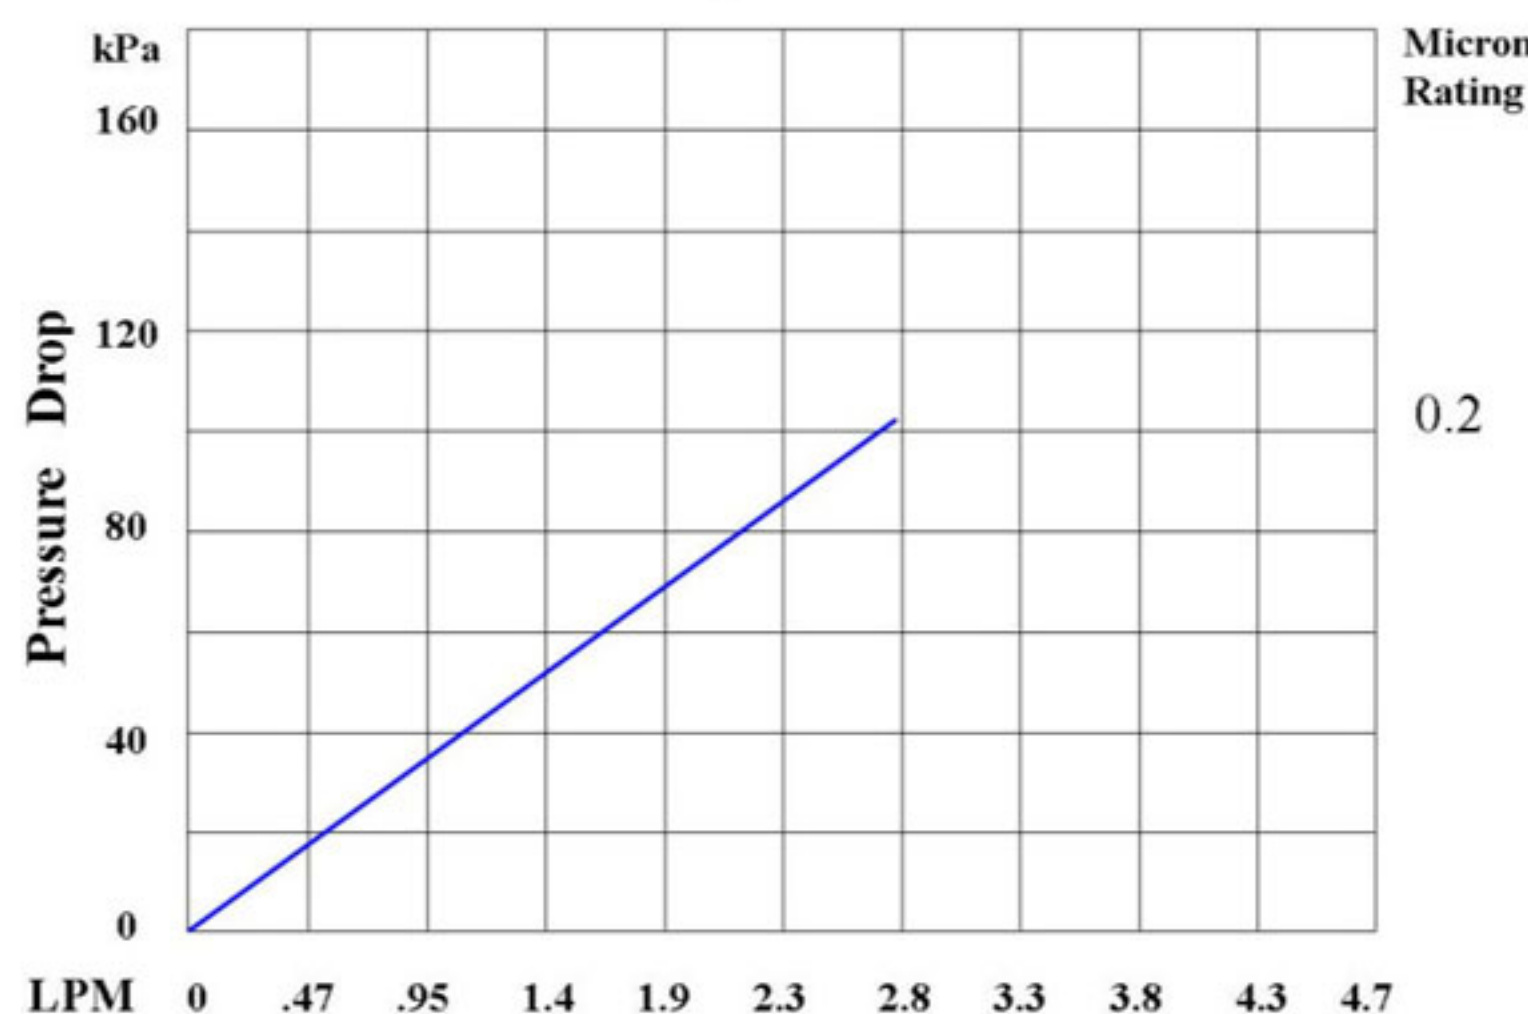

### **NOTE:**

Recommended cartridge change is 6-9 months from date of installation, or earlier if required or at a maximum increased pressure differential of 69kPa (10psi), whichever occurs first.

This cartridge can be cleaned by wiping the surface with a sponge and cold water only.

## Flow Performance

\*Based on 10" length filter in clean water

### **Warning:**

For drinking water applications, do not use water that is microbiologically unsafe or of unknown quality without adequate disinfection.
