# Stainless Steel Cluster Housing

The Stainless Steel Cluster Filter Housings offer a wide variety of applications for the water treatment industry. Simple to install, easy to maintain, and having no water wastage makes these housings an excellent choice for large scale, heavy duty filtration requirements. The Cluster Housings hold 7 cartridges each and come in 4 sizes, 250mm (10"), 500mm (20"), 750mm (30") and 1000mm (40") providing flow rates from 100Lpm to 420Lpm.

The housings are available in 304 and 316 Stainless Steel. They are designed to accept 64mm (2½") O.D. standard Double Open End (DOE) cartridges making them compatible with a wide range of cartridges adding to their versatility. The housing includes a top vent/pressure gauge port on the cap and raw water and filtered water drains located on either side of the sump.

## Features and Benefits

- Price Competitive
- Ideal for High Temperature
- Polished Exterior Finish
- Robust Stainless Steel Construction
- High Flow Rates
- Accepts a Wide Range of DOE Cartridges

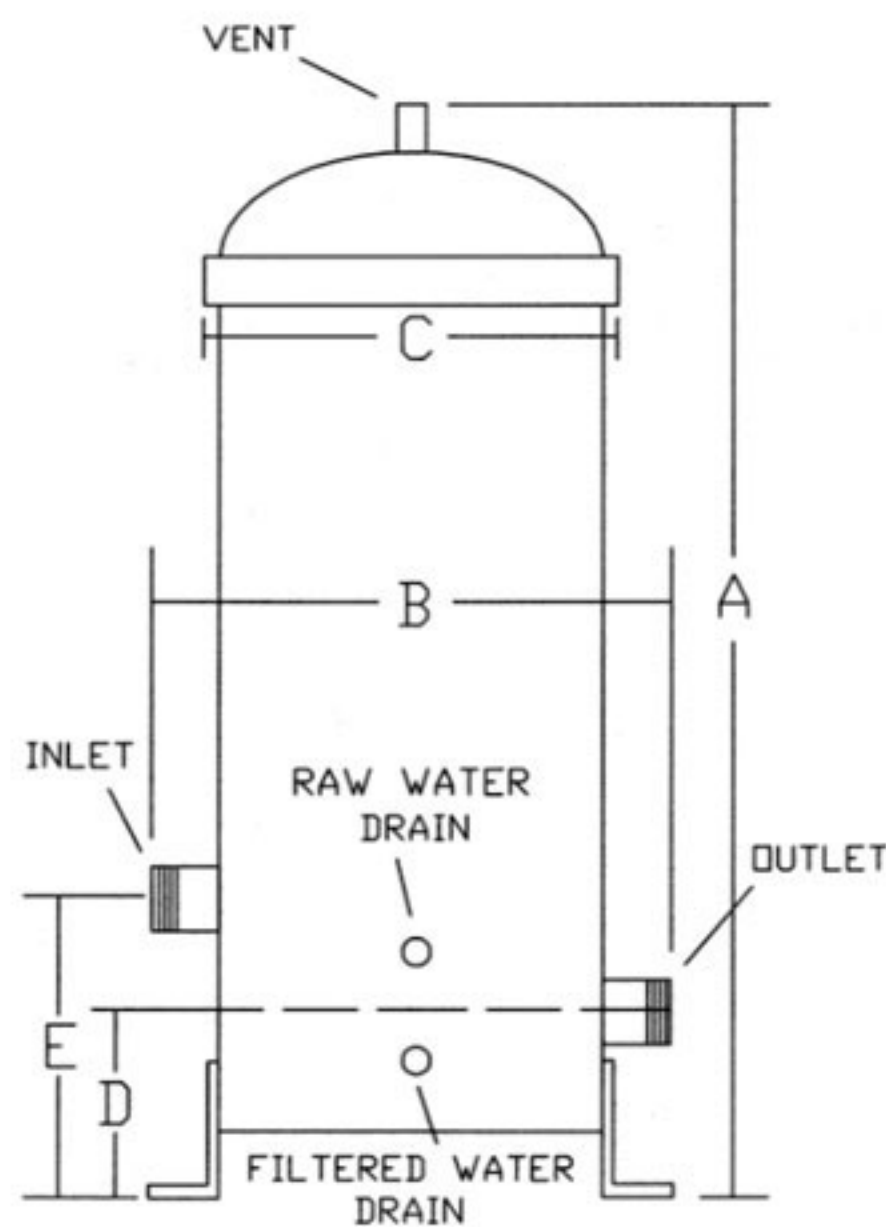

## General Specifications

- Port Size : 10" & 20" 1½" NPT - MI  
30" & 40" 2" NPT - MI
- Temperature Ranges: 4.4°C - 140°C (40°F - 285°F)
- Operating Pressure: 415 kPa (60 psi) (Maximum)
- Recommended Flow Rate: 10" 105 Lpm (Maximum)  
20" 210 Lpm  
30" 315 Lpm  
40" 420 Lpm

**NOTE:** Flow rate will vary depending on type of filter cartridge installed. (Filter Cartridge NOT included)

- Dimensions:

	10"	20"	30"	40"
A.	540mm	780mm	1060mm	1340mm
B.	290mm	290mm	290mm	290mm
C.	250mm	250mm	250mm	250mm
D.	110mm	110mm	125mm	125mm
E.	190mm	190mm	230mm	230mm

**Warning:**  
For drinking water applications, do not use water that is microbiologically unsafe or of unknown quality without adequate disinfection.
