Sediment Pleated Washable - Large Diameter

(PENTEK Brand)

The “R Series” cartridges are manufactured from a durable, non-woven and reusable polyester fabric that is suitable for a wide range of filtration uses. The media is pleated around a polypropylene core for added strength, and the ends are immersed in a thermo-setting vinyl plastisol. Embedding and sealing each end of the pleat in this fashion completely fuses all the components together.

The media is pleated to maximize its dirt-holding capacity and to extend the time period between changes or cleaning. The “R Series” cartridges are resistant to both bacteria and chemical attack making them suitable for a variety of residential, commercial and industrial applications.

Features and Benefits

- Price Competitive
- Durable Polyester Media is Chemical and Bacteria Resistant
- Maximized Dirt Holding Capacity
- Reusable Cartridge, which translates into Money Saved
- Excellent Filtering Performance
- Individually Wrapped and Sealed

General Specifications

- Micron Ratings (Nominal): 30 & 50
- Lengths: 248mm (9¾”)
- Outside Diameter: 114mm (4½”)
- Inside Diameter: 28mm (1⅛”)
- Filter Area Approximately: 1.48m² (16 ft²)
- Temperature Ranges: 4.4°C - 52°C (40°F - 125°F)

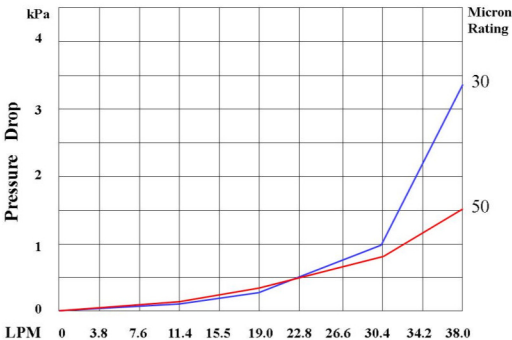

NOTE:

Recommended cartridge clean or change is at a maximum increased pressure differential of:

69 kPa (10 psi)

Flow Performance

*Based on 10” length filter in clean water

Warning:

For drinking water applications, do not use water that is microbiologically unsafe or of unknown quality without adequate disinfection.

Typical Applications

- Domestic
- Rural
- Commercial
- Light Industrial

Materials of Construction

- Filter Media: Non-Woven Polyester
- End Caps: Vinyl Plastisol
- Core: Polypropylene

Series: W CSPRL
