Sediment Spun Polypropylene - Large Diameter

(GE Water Brand)

The Melt Blown Sediment Removal Filter incorporates innovative Dual Gradient Depth Filter technology for maximum dirt holding capacity with exceptional high quality and cost effectiveness to provide excellent filtration value. Our "MBB" filters are built for extended service and to provide greater value for the replacement market.

Melt Blown Filters are ideal for residential and light commercial water filtration where 10 and 20 inch filter housings are used. Melt Blown Filters are competitively priced without compromising the quality for which GE Water Technologies is known.

Features and Benefits

- Price Competitive
- Dual Gradient Density
- Large Diameter, Higher Loading Capacity
- Excellent Filtering Performance
- Pure Polypropylene Construction
- ANS/NSF Listed for Material Safety

Typical Applications

- Point of Use
- Whole House
- Commercial
- Light Industrial
- Ground Water
- Sea Water

General Specifications

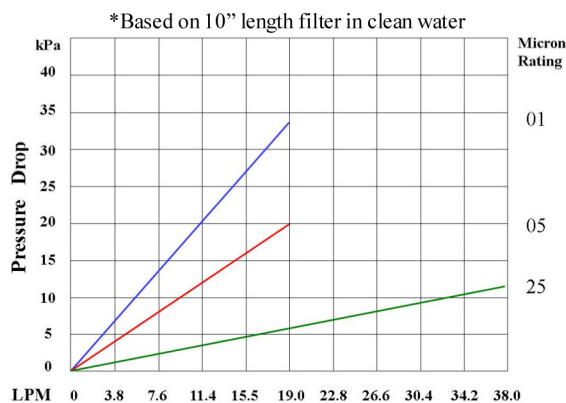

- Micron Ratings (Nominal): 1, 5 & 25
- Lengths: 250mm (9 $\frac{7}{8}$ "
508mm (20")
- Outside Diameter: 114mm (4 $\frac{1}{2}$ "
- Inside Diameter: 25mm (1")
- Temperature Ranges: 0.5°C - 52°C
(33°F - 125°F)

NOTE:

Recommended cartridge change is at
a maximum increased pressure
differential of:

69 kPa (10 psi)

Flow Performance

Warning:

For drinking water applications, do not use
water that is microbiologically unsafe or of
unknown quality without adequate disinfection.
